

1100

The Dulevo 1100 man on board sweeper has been designed for operation in all dusty environments.

It is capable of capturing from the finest of particles up to gravel-sized debris. It is perfect for all heavy duty industrial applications, and for use in public spaces as well as loading and unloading areas such as warehouses, loading bays, car parks, etc.

Easy access to all components and entirely hydraulic technology render the sweeper simple and cheap. The 1100 sweeper is available in the BS version with a petrol and LPG engine, DL diesel version, suitable for outdoor areas, and the EH version with battery-powered engine, for indoor and outdoor areas. Each version can also be enriched with an extensive range of accessories.

Characteristics:

- Direct load sweeping system for exceptional cleaning results, even under particularly arduous work conditions;
- Steel body suitable for heavy duty works;
- Compacting system inside container which increases collection capacity;
- No electronics;
- Beltless turbine which does not require maintenance;
- No tools required to replace the central brush;
- Easy filter access for inspection and cleaning.

In addition to the high quality filter mounted as standard, the Dulevo 1100 man on board sweeper can also be equipped with an even higher performance filter. Gore® technology guarantees the best filtering results thanks to: improved dust control (up to 1 micron), improved aspiration, easier and more economical maintenance.

Technical data		1100EH	1100BS	1100DL
Sweeping width:				
- With main Brush	in		29.53 (mm750)	
- With main brush and RH brush	in		44.88 (mm1140)	
- With main brush, RH and LH brushes	in		56.69 (mm1440)	
Net capacity	gal		31.7 (Lt. 120)	
Dumping height	in		1325 (mm1325)	
Cleaning performance	y ² /h		12,055,6	
Cleaning performance	m ² /h		10080	
PM10 filtration	%		99	
Maximum speed	mph		4.35 (km/h 7)	
Fuel		Battery	Petrol/LPG	Diesel*
Length x width x height	in	78.35 x 48.43 x 54.33 (mm 1990 x 1230 x 1380)
